

A (w)hole new game

For decades, BENZING has been a pioneer in developing smart electronics and software for the racing pigeon sport, and the new BENZING Live ClubSystem sets new standards once again. The smart clubunit combines advanced technologies such as cloud-based race management, a full-colour touchscreen and an integrated GNSS antenna. It's the perfect solution for clubs and fanciers ready for the future.

While the long-awaited USB printer support is finally available, the Live ClubSystem is already designed for the use of online PDFs, actively supporting environmental protection.

Cloud based
Race Management

Redundant
Time Source

Full Colour
Touch-Screen

Built-In
Cellular and WiFi

USB Printer
Support

Integrated GNSS
Antenna (no radioclock
and GPS needed)

Cloud Solutions for Your Club

All basic features of a regular ClubSystem are included. By adding an optional BENZING Live ClubSystem subscription, you can unlock full access to advanced cloud features. See the table below for a detailed comparison of included and additional features.
